A
Transient and late outcomes
Mean damage
Time (model units)
Passivation: $t_0 = 0$
Passivation: $t_0 = 8$
Passivation: $t_0 = 16$
Passivation: $t_0 = 24$
Combination: $t_0 = 0$
B
Onset and assessment horizon
Mean damage at endpoint
Intervention onset t_0
Passivation
Clearance
Combination
$t = 200$ (solid)
$t = 40$ (dashed)
C
Combination dose landscape
Passivation infusion u_P
Oligomer clearance c_Y
Mean damage at $t = 200$
D
Interaction relative to Bliss
Simulated combination benefit
Bliss-predicted benefit
Bliss independence
